SUMMARY

Aspiring Data Analyst, Data Engineer, and AI/ML Engineer with hands-on experience in Python, SQL, and machine learning. Built ML models achieving up to 85% accuracy and processed 25,000+ record datasets into dashboards and reports using Power BI. Seeking a role to apply data analysis and engineering skills to real business problems.

SKILLS

- Languages & Databases:** Python, SQL, Java, MySQL, PostgreSQL, SQLite
- Data Analysis & Visualization:** Pandas, NumPy, Power BI, Excel, ETL
- Machine Learning:** Scikit-learn, XGBoost, LightGBM, CatBoost, Predictive Modeling, Deep Learning, NLP
- Frameworks:** Django, REST API

EXPERIENCE

Data Science Intern — Unified Mentor Pvt. Ltd.

Jun 2024 – Sep 2024

- Conducted EDA, predictive modeling, and dashboard creation using Python, Excel, SQL, and Power BI
- Leveraged Scikit-learn models and Python libraries (NumPy, Pandas, Matplotlib, Seaborn) for in-depth data analysis
- Transformed real-world datasets through in-depth analysis, streamlining, and visualization, improving model accuracy

KEY PROJECTS

Data-Driven Employee Performance Prediction

- Built a machine learning model to predict employee performance with up to 85% accuracy using historical HR data
- Identified key performance drivers through visual analytics and feature importance, improving model insights by 30%
- Benchmarked XGBoost, LightGBM, and CatBoost, achieving a 12–15% boost in predictive performance over baseline models

Vendor Performance Analysis

- Processed and cleaned 25,000+ rows of sales data using Python and SQLite3, reducing data preparation time by 60%
- Built SQL queries and summary tables to evaluate vendor KPIs, identifying the top 10 and bottom 10 vendors by sales and revenue
- Delivered an interactive Power BI dashboard, improving reporting efficiency and cutting manual analysis time by 70%
- Delivered actionable insights that supported vendor partnership decisions, contributing to a 15% improvement in sales from top-performing vendors

Face Attendance System

- Developed a real-time face-recognition attendance system using Python, OpenCV, and machine learning, with a Tkinter GUI
- Integrated a PostgreSQL database for secure, timestamped attendance logging
- Replaced manual entry with automated logging, reducing processing time by over 70%

EDUCATION

Bachelor of Technology, Artificial Intelligence — BBD University, Lucknow

Sep 2020 – Jul 2024

CGPA: 8.2

Relevant coursework: Data Analysis using SQL, Introduction to Python, Machine Learning, NLP, Deep Learning, Intelligent Systems, ANN, Statistical Techniques

CERTIFICATIONS

- Data Science Bootcamp with AI — Udemy, Aug 2025
- Data Science — Unified Mentor Pvt. Ltd., Sep 2024
- Web Development with Django — Internshala, Feb 2022

ADDITIONAL INFORMATION

- Member, University Sport Club (Aug 2021 – Mar 2024)
- Hobbies: Chess, Stargazing
